 Anron Energy Ltd
 Company

ABOUT US :

In the Mid - Nineties In 1968, Tawfiq Abdul Rahim Mutahar relied on him self to create a company concerned with the fields of management , implementation and marketing of the most important centers of power in the area of economic development and investment in the republic through Providing the Following Services:

Head Quarter Office

- Marketing , sale and import of Oil derivatives .
- Retailing of petroleum Bunkering .
- Trading (Import &Export) ..
- Services (Transportation + projects Management) .
- General Construction and General Contracting .

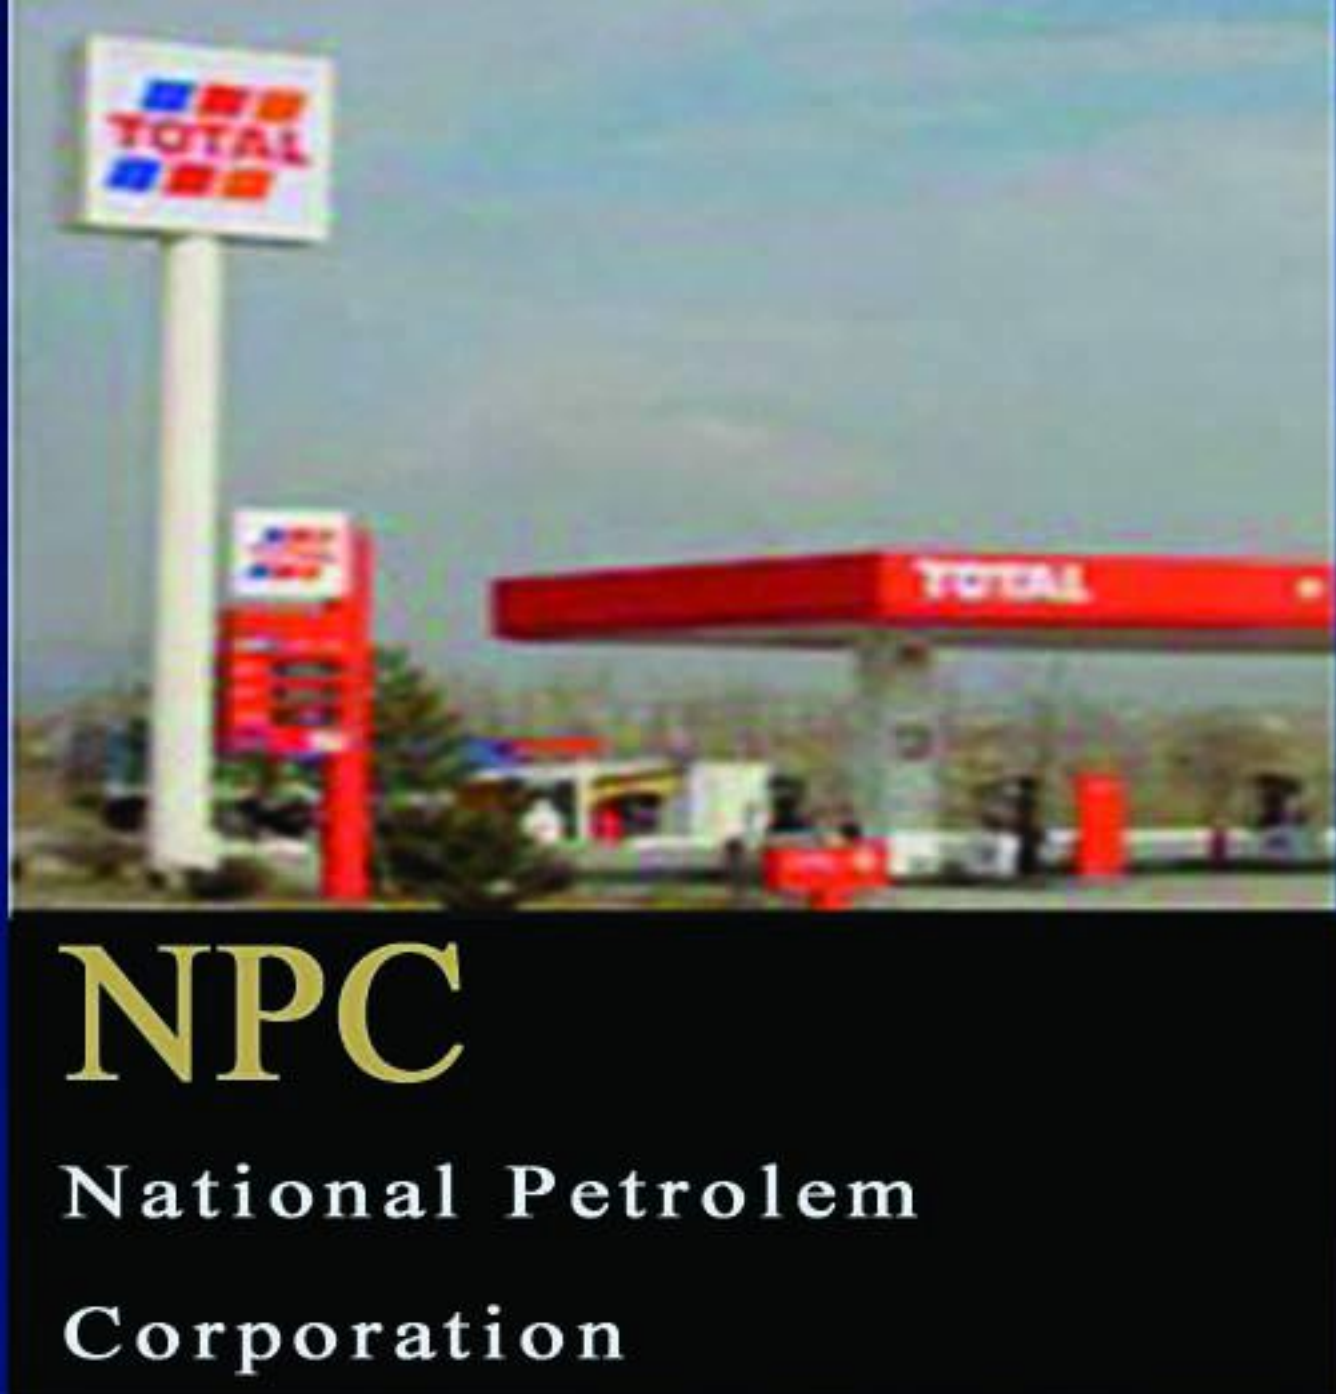

The Group is Considered as one of the Leading Commercial Group in the Country in Terms of Scope of Operation, Volume of Investment, in Addition to Its Leading Competitive Edge in the Retailing of Petroleum Products, and Its Rich Physical, Financial and Intellectual Resources .

The Group Success is Based on a Strong Commitment to Quality and Reliability which are derived from the Group's unique resource.

The Group Strives to Maintain the reputation it had Gained at all Levels through out its business history . It also aims to broad its business portfolio through combined vertical and horizontal integration in its associated industries.

The Group is one of the major and Strategic contributors to the national economy and society welfare.

ENMMAR

ANRON

Anron Energy Ltd
Company

ABOUT THE FOUNDATION :

The National Petroleum Corporation was established in 1968 , A Station which offers service and covers the internal and overseas markets of petroleum products And increased growth of the company made it become the largest company in the marketing,sale and storage of petroleucts in Yemen .

The strategic location of the institution is in the province of Aden , overlooking the Arabian Sea Indian ocean and Red Sea to make the institution become the main Supplier of Petroleum products in these places and with the following lines .

Europe - Far East container shipping lines v.v.

Europe – Australia/ New Zealand trade v.v.

Europe- Indian Subcontinent trade v.v.

East Africa – Europe, Indian Subcontinent v.v.

Any bulk carriers and tankers passing the Red Sea

TRADE OF PETROLEUM PRODUCTS :

In Addition , NPC is involved in the business of trading :

Crude oil - Petroleum Products - Liquid Petroleum Gas - Liquid Natural Gas .

SUPPLY:

The institution supplying petroleum products following parties:

- Power plants, the Republic of PAL (diesel - fuel oil) in quantities up to a million and 1.2 million two hundred thousand tons per year.
- Private sector factories and public mind (diesel) in the following governorates (Hodeidah - Aden - Taiz) in quantities up to 170 000 one hundred and seventy thousand tons per year.
- Cement Factories PAL (fuel oil) in Quantities up to 155 000 one hundred and fifty - five thousand tons per year.

For future expansion The Group has plans to build a new tank storage terminal at the free . zone in the Aden port, as land is already available to build such site.

STORAGE:

The Corporation has storage Facilities in Aden Connected Tubes floating freely in order to supply ships and cargo ships as well as the U.S. Department of Defense and Chinese.

The Corporation has a Network of Pipes Connected With the Aden Refinery Direct and quantities up to 165 million tons a year.

The Corporation has Storage Facilities for Petroleum products and Providing Them to Customers.

Provide online storage of oil Derivatives to customers.

The sale of oil derivatives :The company is the sale of petroleum products (oil diesel - diesel - kerosene)for government Institutions and enterprises as well as Private and Foreign Markets and in Quantities of up to three Million tons per year .

OIL STATIONS:

The Corporation has several stations, Oil up to 20 stations Distributed Over the various governorates of the Republic.

The Corporation has a Strategy to Increase the number of Stations to 50 stations.

GAS STATIONS:

The Corporation has the lead in the Mobilization and Distribution of Cooking Gas LPG Filling Stations Across the Foundation and Providing Gas to Customers.

As Domestic Gas is Exported to Some Foreign Countries Such as Italy and Africa in Quantities up to 50,000 fifty thousand tons per year.

The Company owns the following Gas filling Stations:

Location	Production Capacity
Taiz Filling Station	40,000 Butane Cylinders Per Day
Sana’a Station	30,0000 Butane Cylinders Per Day
Lahaj Station	15,000 Butane Cylinders Per Day
Turbbah Station	10,000 Butane Cylinders Per Day

TRANSPORTING :

National Petroleum Corporation (NPC) was founded in Line with Groups , 1977 It considers to be the Largest Transportation Company in the Country. Under this Sector, it Maintains the Largest Transportation fleet that Comprises of more than 600 light, medium, heavy duty trucks Including trailers, Semi trailers tankers of Different loading Capacity that range From 10 ton up to 80 ton. This massive Fleet has Equipped the Division with a Leading Competitive edge as Being the Most Reliable Transportation Fleet in the Country that is Assigned to Undertake the Transportation of Petroleum products to all Power Stations in the Country, Airports ,Cement and Steel factories and many other Industrial corporations.

THE COMPANY PROVIDES THE FOLLOWING SERVICES :

Transporting Crude oil, LNG, LPG from production sites to all Yemeni Sea Ports for exports.

Transporting LPG from production sites to Group's filling stations.

Transporting petroleum products (petrol, diesel, kerosene, Fuel Oil etc) to group's service stations, storage facilities, and to Public and Private corporations all over the country.

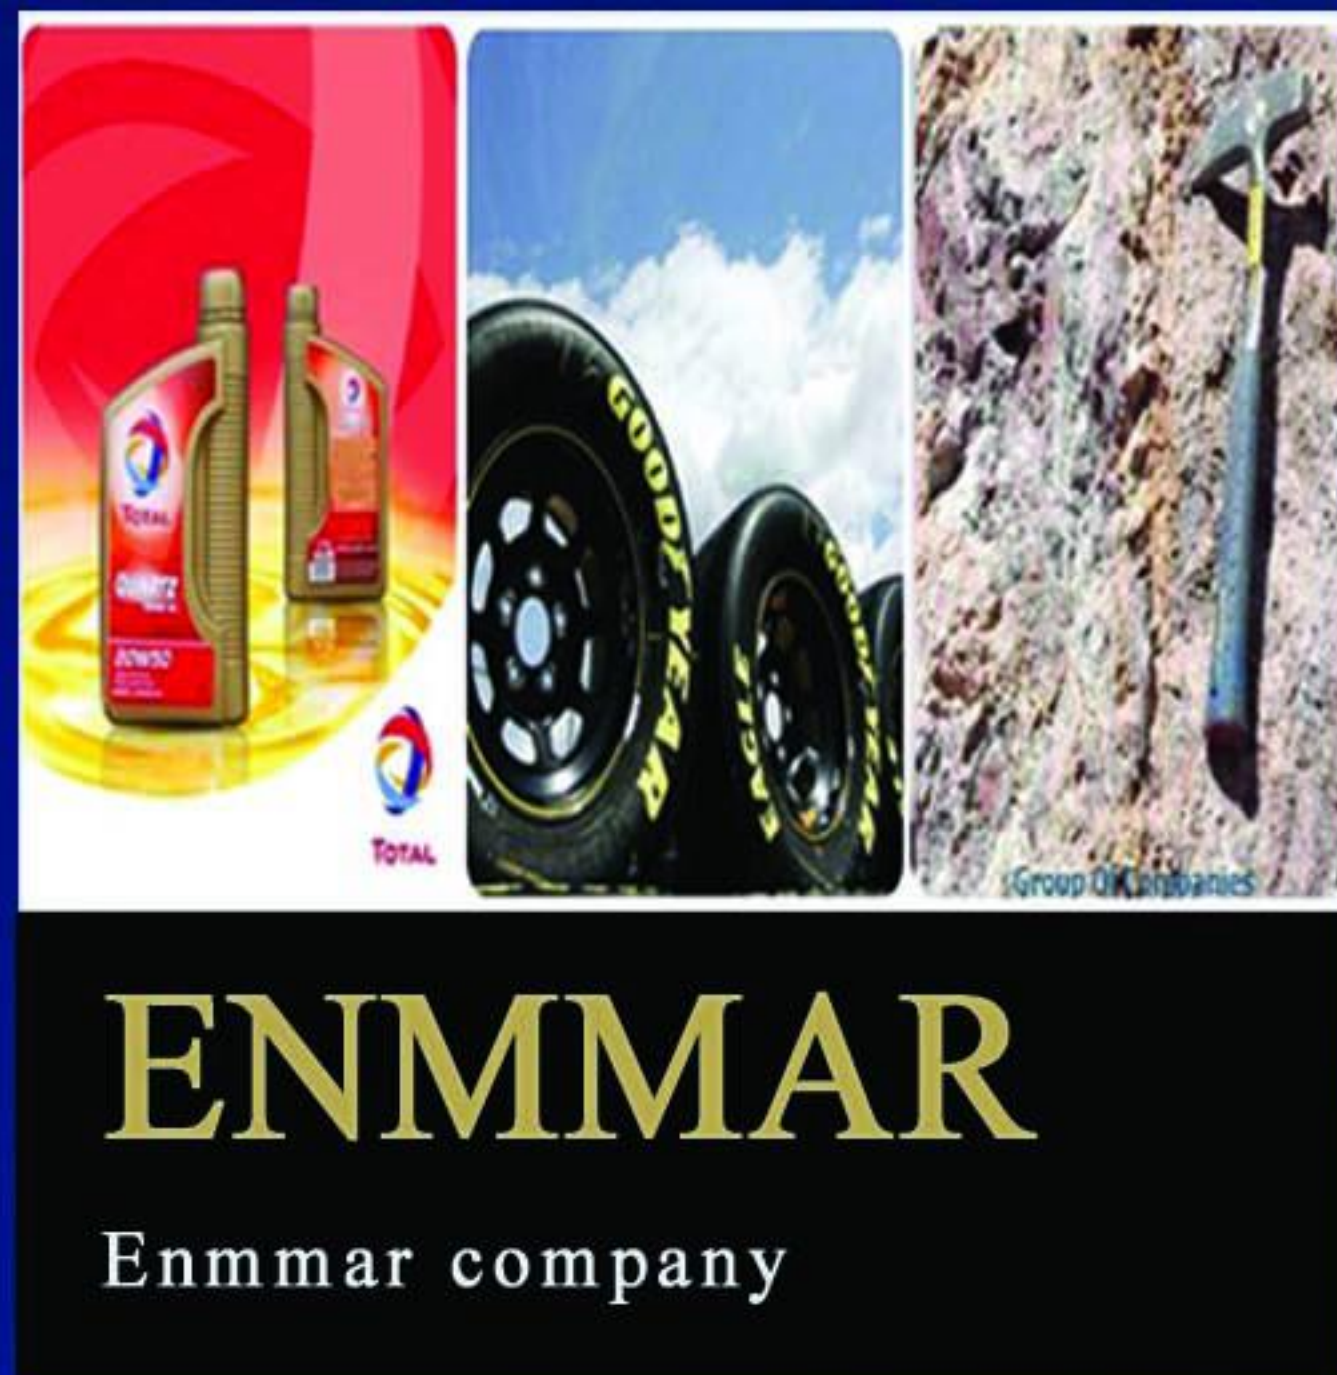

Transporting heavy tools equipments, Goods, and any other Commodity to and from the main sea ports to different destinations around the country.

MAINTENANCE WORKSHOP : NPC is equipped with over 4200 Sq Meter an up-to date work Shop Supported with high Skilled Mechanics and Technicians to Ensure proven capabilities in the area of preventive maintenance. Also it has 5 mobile Maintenance vans for emergency cases.

ANRON
Anron Energy Ltd
Company

ABOUT US:

This is One of the Most Important Companies in the Group . The Company Owns Number of International Agencies in Electrical Sector , Tires and Motor Oil , Also the Agent for TOTAL Lubricants & Good Year Tires in Yemen Region.

Enmmar is an Active License with Prospecting Permit and Exploration Assets in Tais, Lahj Yemen.

OIL SECTOR:

The company is a direct distributor of the National Oil Corporation, which in turn is the sole Agent of Total World in Yemen.

The Company Also Owns five Branches in Different Governorates of the Republic With the Distribution Service to Customers.

ACTIVITIES:

The Company Markets 99 kinds of Oils type the Following:

- Industrial oils
- Marine oils
- Commercial oils (Cars - Trucks) .

CLIENTS :

- Total E/ P
- YLNG .
- Jana hunt .
- Safer company .
- Local corporation for water
- Aden refinery company .
- Aden for Iron company .
- Ministry of electricity .
- General corporation for roads and bridges .
- Yemen company for silos Harvest limited
- Corporation of Yemeni red sea harbors .
- Alahram company .

SERVICES:

The Provision of Free Supplies of Oil for Testing and Follow - Up to Clients Under the supervision and experienced team Ojanbe high.

The Company also makes training sessions by foreign experts of the technical team in order to equip them to provide outstanding service.

The Company Provides distribution Service oils by Private cars to Customers.

TIRES SECTOR :

The Company is Exclusive agent for the tire Company and the global Good Year provided in five sections distributed in different governorates of the Republic :

(Taiz - Aden - Hodeidah - Hadramout) .

TIRES TYPES:

- Tires long distances (long Hual) .
- Tires short distances (Regional hual) .
- strong Tires that are used in maintenance of roads (Mixed Service) .
- off-road tires and tires of war (Municipal) .
- Winter tires (Winter) strong Tires that are used in maintenance of roads (Mixed Service) .

TAWFIQ TRADING :

Tawfiq Trading Member of Enmmar Company. This Sector Represents Many of Global and International Companies , Under the Consortium of Enmmar, Yemen and lead the Trading of Their Products at the Market With Honorary awarded.

TAWFIQ TRADING REPRESENT THESE INTERNATION COMPANIES :

Gulf Oil Company	U.S.A
Bennett Pump Int'l Gorp	U.S.A
Westact Power Limited	U.K
Hengest Filterer	Germany
Steco Batteries	France
Liquid Control Int'l Gorp	U.S.A
Nova Comet SRL	Italy
Antonio Merloni	Italy
Cylinders	K.S.A
Carrserie Abillama SAL	Lebanon
Petposan A.S	Turkey

COMPANY IS INTERESTED IN MARKTING THESE PRODUCTS:

The following Products are being marketed through well established show rooms all over the country :

TYERS (FOR ALL APPLICATIONS)	AUTOMOTIVE AND MARINE LUBRICANTS
LPG CYLINDERS	GENERATORS 10 KVA-2500 KVA
AUTOMOTIVE FILTERS	LPG CYLINDER VALVES
AUTOMOTIVE BATTERIES	TRAILERS
LIQUID METERS	FUEL DISPENSER PUMPS
TRUCK SPARE PARTS	PETROLEUM EQUIPMENT
FUEL FILLING AND EXCRETING PUMPS	FUEL PIPES (IN ALL SIZES)

ANRON

Anron Energy Ltd
Company

ABOUT THE FOUNDATION:

Pioneers Power PPL . was founded in 2009 and Serving in power sector with good reputation which is recognisable locally and internationally.

Company is equipped with latest tools and methods under the supervision of local and foreign experts .

OUR CLIENTS :

The company is dealing with most of government organizations and Private sector in Different area of Yemen With Maintaining All Internationally safety standard . Company is also doing business with International Companies , TOTAL and Canadian Nexen.

PIONEERS GAS POWER PLANT (70 MW)-SIEYUN, YEMEN :

Pioneers gas power plant(IPP)is the first gas fired plantin Yemen which contains two Phases and it has TOTAL Power generating capacity of 70 Mw. Pioneers

is Located Inside the TOTAL Block 10 Kharir Area(East Shabwa)in Hadramout province. It is delivering power to PEC (Local Power Network of Yemen) and PEC is Distributing Power to Cover all Wadi Hadramout Area.

PHASE I

Phase I has been in operation since December 2009, which contains of (6) no's Turbomach Gas Turbines Taurus 60, each Having capacity of (5.6MW). Turbomach is Swiss based Company Which is Now Taken by SOLAR Catterpillar. Phase I is Capable to Run on dual fuel modes (gas and diesel) Turbomach completed gas commissioning in december 2009 and they Completed diesel commissioning at the end of 2010.

DETAIL OF ALL AUXILIARY EQUIPMENT IS AS UNDER:

- Power Transformer(TUSCO) (6MVA 11/33 Kv) .
- Switch Gears 33kv Schneider Electric.
- Black Start Generator (Perkin) .
- Cooling Towers (Liangchi) .
- Water Treatment Plant .
- Air Compressors Atlas Copco .
- Fire Fighting System .

Pioneers is providing electricity to local people by operating plant in very smooth way forty Persons including aspects are giving their services to Pioneers to maintain the plant.

PHASE II :

Phase II contains 3 No.s Turbomach Taurus 60 and 1 No. Titan 130 Turbines each Taurus 60 have capacity of 5.6MW and Titan have capacity of 15MW. Phase II is under commissioning, Two turbines has been commissioned on June 2013, Since commissioned phase II power shortage problem in Wadi is resolved. To overcome the problem of power shortage in Wadi Hadramout, Pioneers has used full abilities of his employees to finish the phase II in the given time.

DETAIL OF AUXILIARY EQUIPMENT OF PHASE II IS AS UNDER :

- Power Transformer 7 MVA (Euro Gulf) 11/33kv
- Power Transformer 18 MVA (Euro Gulf) 11/33kv.
- Switch Gears Schneider Electric.
- Air Compressors Atlas Copco.
- Black Start Generator (Perkins).
- Fire Fighting System.
- Plant automatically activated safety system.
- Booster Gas Compressor.

PHASE II :

Pioneers is Providing Better job Opportunity to local people; more than 40 people are working on phase II Pioneers is Serving the People of Wadi Hadramout by Providing Electricity without any interruption . To make more safe and reliable operation, Pioneers is using the best available skills and equipment.

DIESEL POWER STATION (60MW) TAIZ, YEMEN :

Diesel Power plant in Taiz is working since summer 2012 . It has (60 MW) total generating capacity . This plant is Providing Electricity to local people Through PEC , to Overcome Power shortage problem in Taiz .

ADEN REFINERY STEAM POWER STATION(50MW)-ADEN, YEMEN :

In Aden , refinery (50MW) plant is running . This is Acombine Dcycle Power plant . HFO is Being Used as primary fuel. Pioneers commissioned this Plant in June 2013 and it is in operational condition .

ABOUT US :

Aljazira Oil Field Services and Contracting Corp. was Founded in 2000 In The Field of Engineering Construction and Contracting . The Foundation is One of the First Intuitions of Engineering and Construction in Yemen which Brought it the Experience and Design Which Made it be One of the pioneers of development in the field of engineering and contracting in the country .

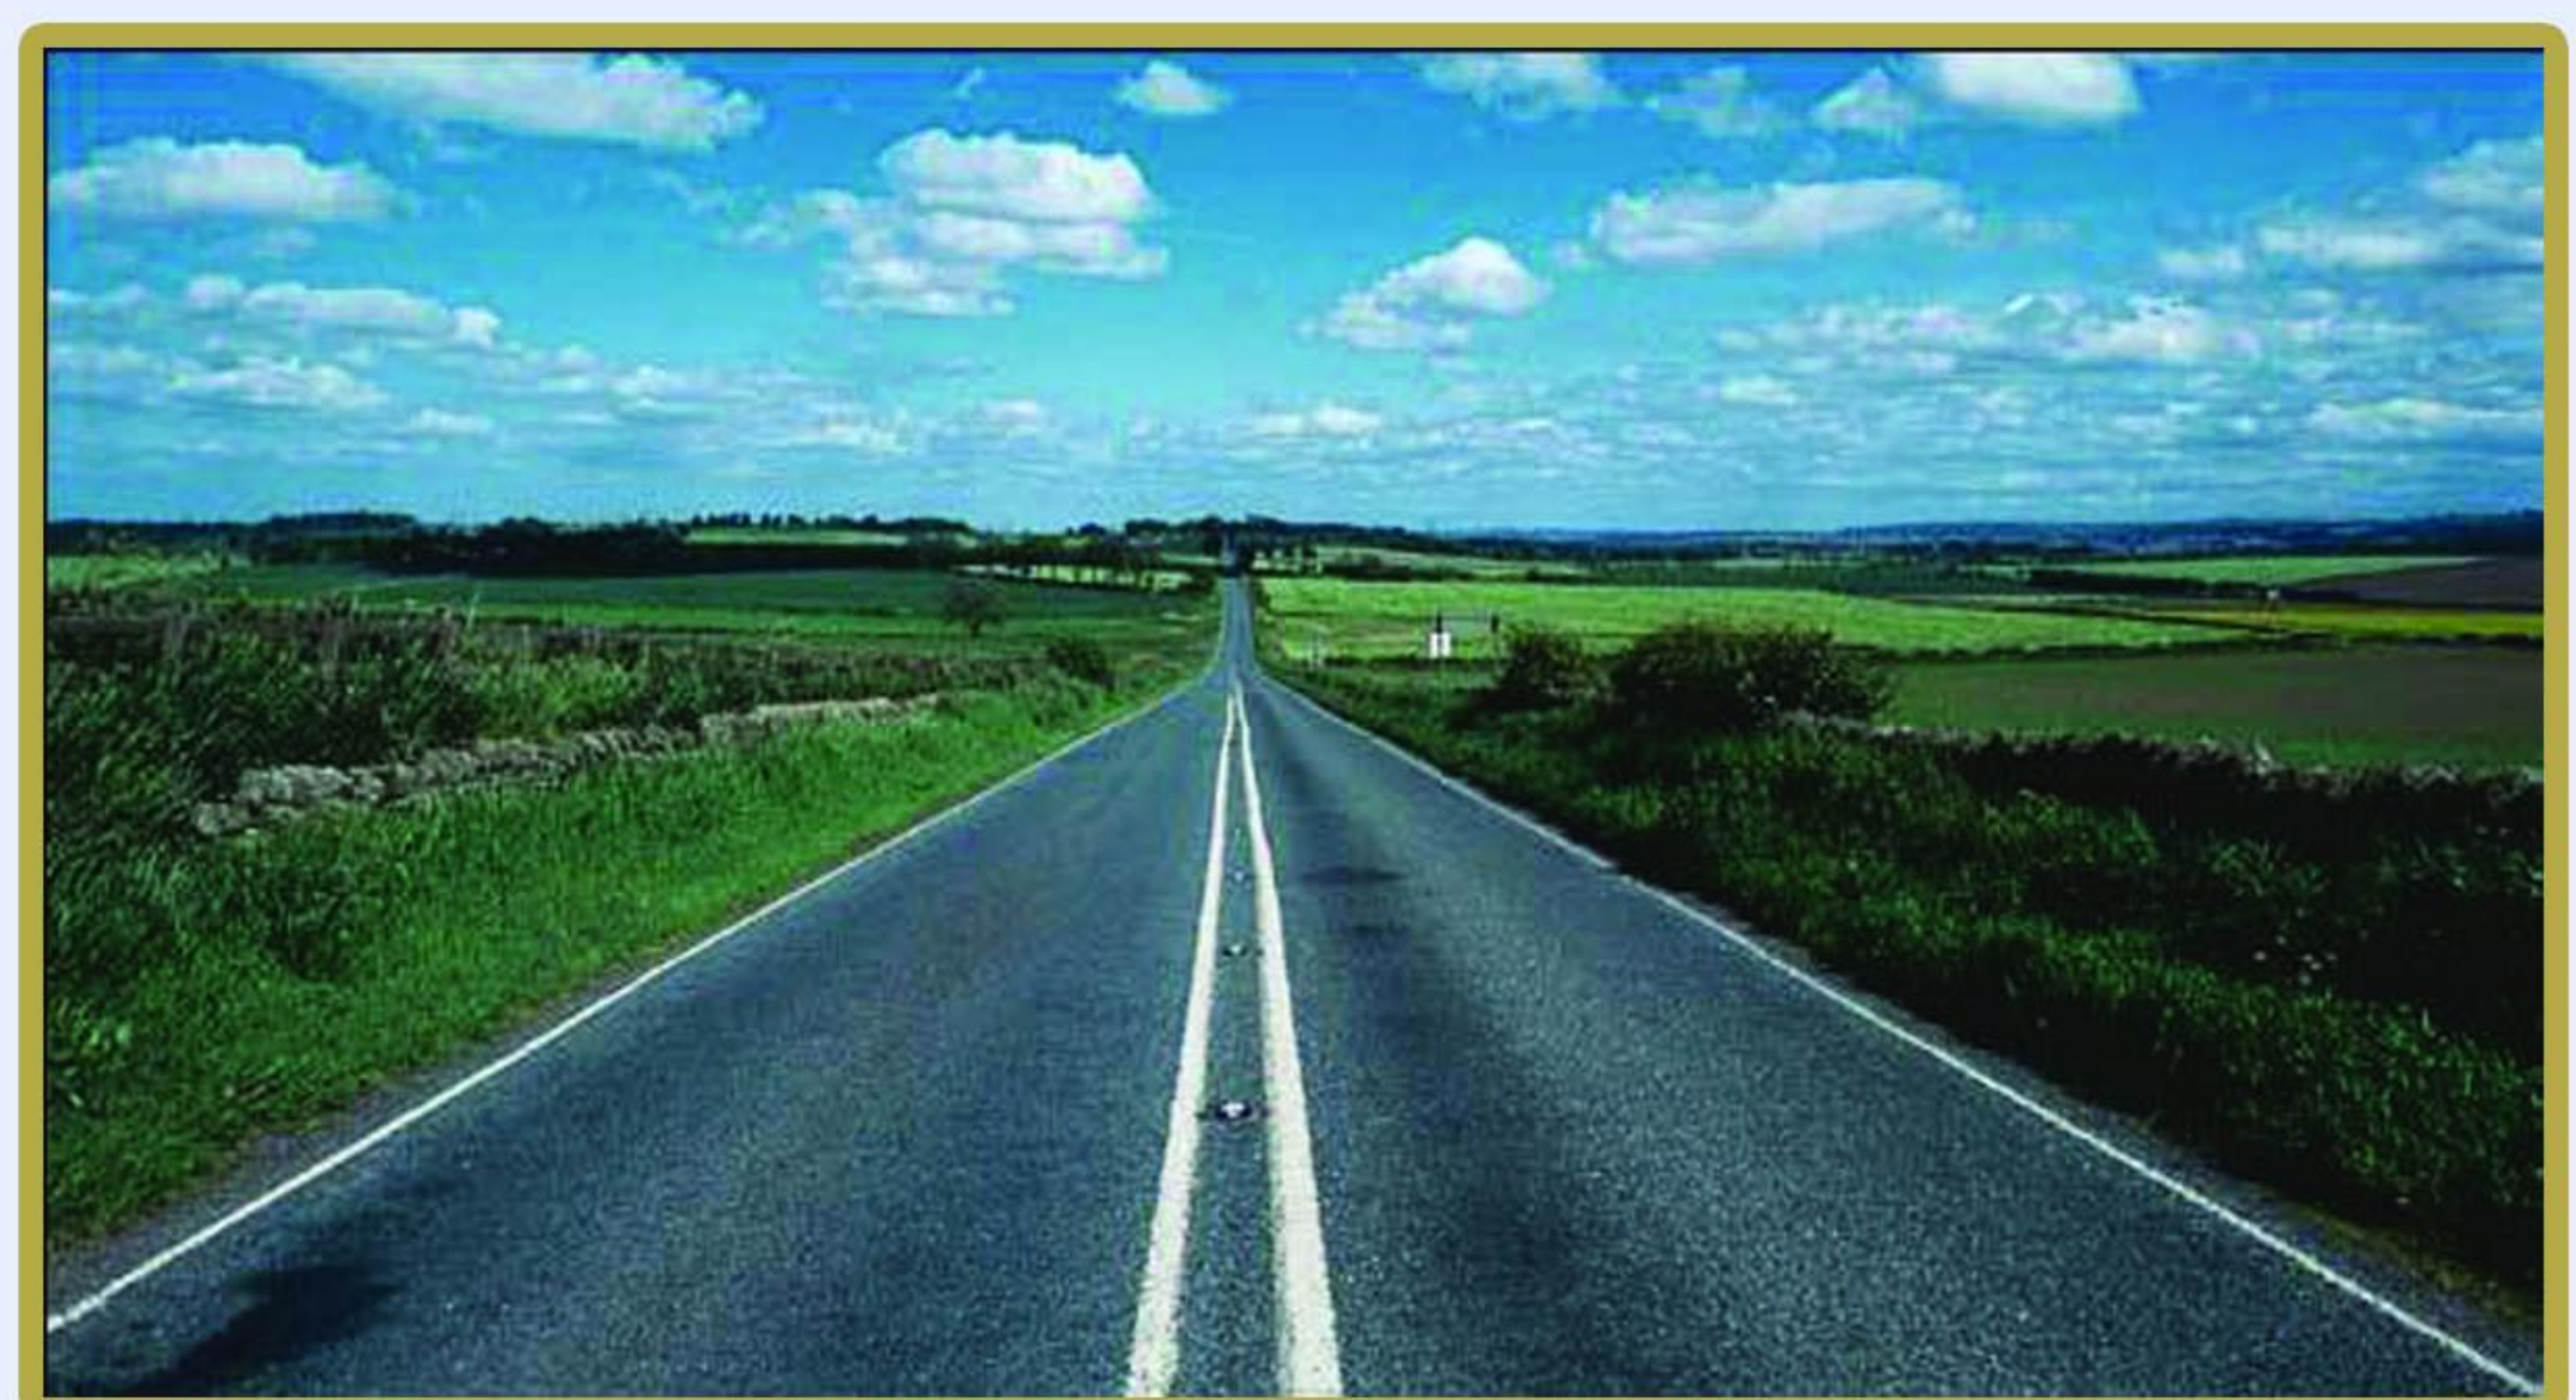

COMPANY ACTIVITIES:

Company is interested in all activities in the field of engineering, contracting and construction by:

Implementation of different types of real estate development including residential, offices ,business centers, commercial center, parks, hotels, health and educational facilities.

- Implementation of road works, bridges and infrastructure.
- Implementation of Concrete and deep foundations.
- Implementation of steel buildings.
- the implementation of the construction work station oil and gas.
- Implementation of the water system and pipes.
- Engineering and architectural designs.
- provision of consultancy services.

The company owns an integrated system of machinery and equipment , workshops and engineers, making it fully qualified to carry out projects as the best results:

- o Mixers Ozfelt , Breakers, temperatures, Dakkakat, Gravat, Kimberishnat with Login Dril, graders, and aitat spraying water, and Aitat asphalt, butterflies asphalt, Dakkakat Iron 8 tons, tip the transfer of large size, Dhakakat rubber and 12 tons, locomotives, and frigates, mixers Concrete Casual, Screeners .
- o The Company also Owns and Equipment Maintenance Workshop Equipped with all the Equipment Necessary for the Maintenance and my Laboratory Materials and Equipment space .
- o The Company has Engineering staff and Advisory and Technical with Highlevelin all Disciplines, Local and foreign.

OUR STRENGTH :

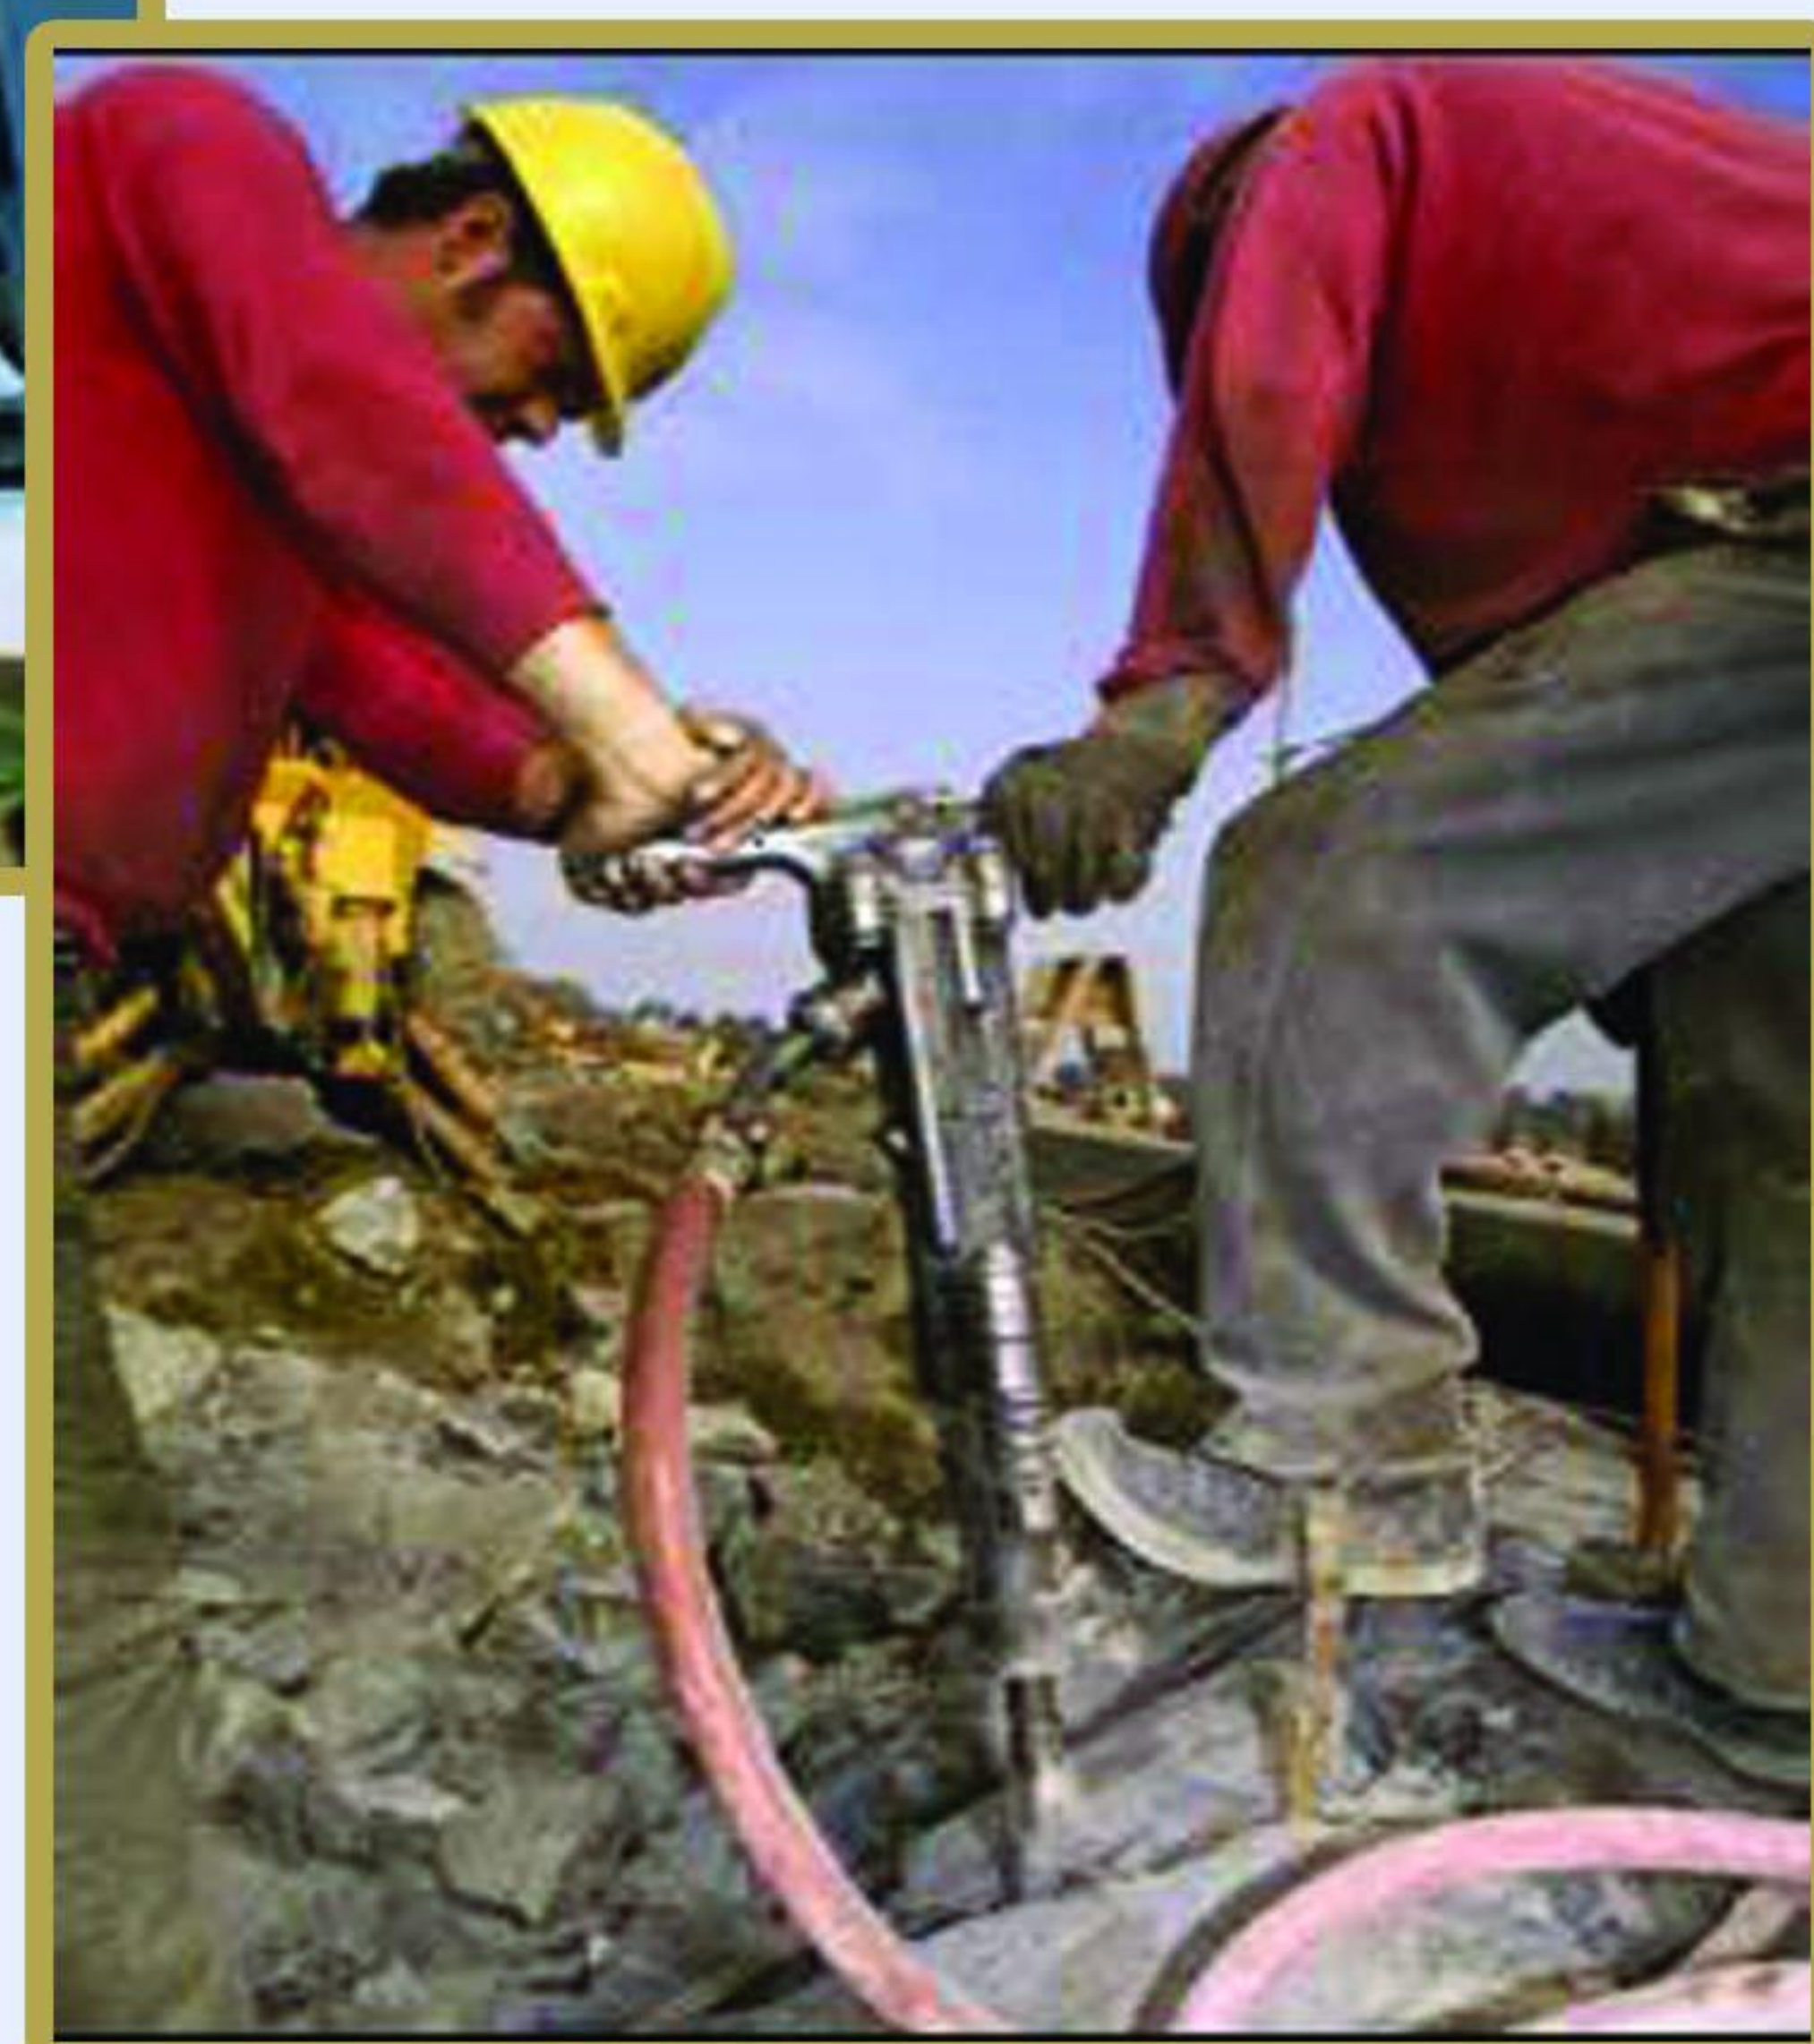

Institution-centered position of strength, what follows:

Adoption of the institution on a platform of knowledge in the field of implementation through the preparation and follow-up and the provision of modern software for completion:

- Schedules for implementation and that the institution is committed to on-time delivery .
- Programs needs articles .
- Drivers .
- Employment programs .
- Safety and security programs, which are interested in the organization by providing the latest means of the piece.

The Company has a Section for Development to Improve Business Performance through Training and the creation of Innovative Solutions in the field of Construction.

Aljazira has Executed and Handed over a lot of Different Projects such as Al Tawfiq Tower, AL Subashs Oil Installation Phase I and Phase II, Hujiff Installation plant, NPC Alrbaa'at Service Station, In addition to the Construction of Villas, and car Service Stations as well as Steel Construction such as Sheds, Warehouses and Stores are turnkey projects.

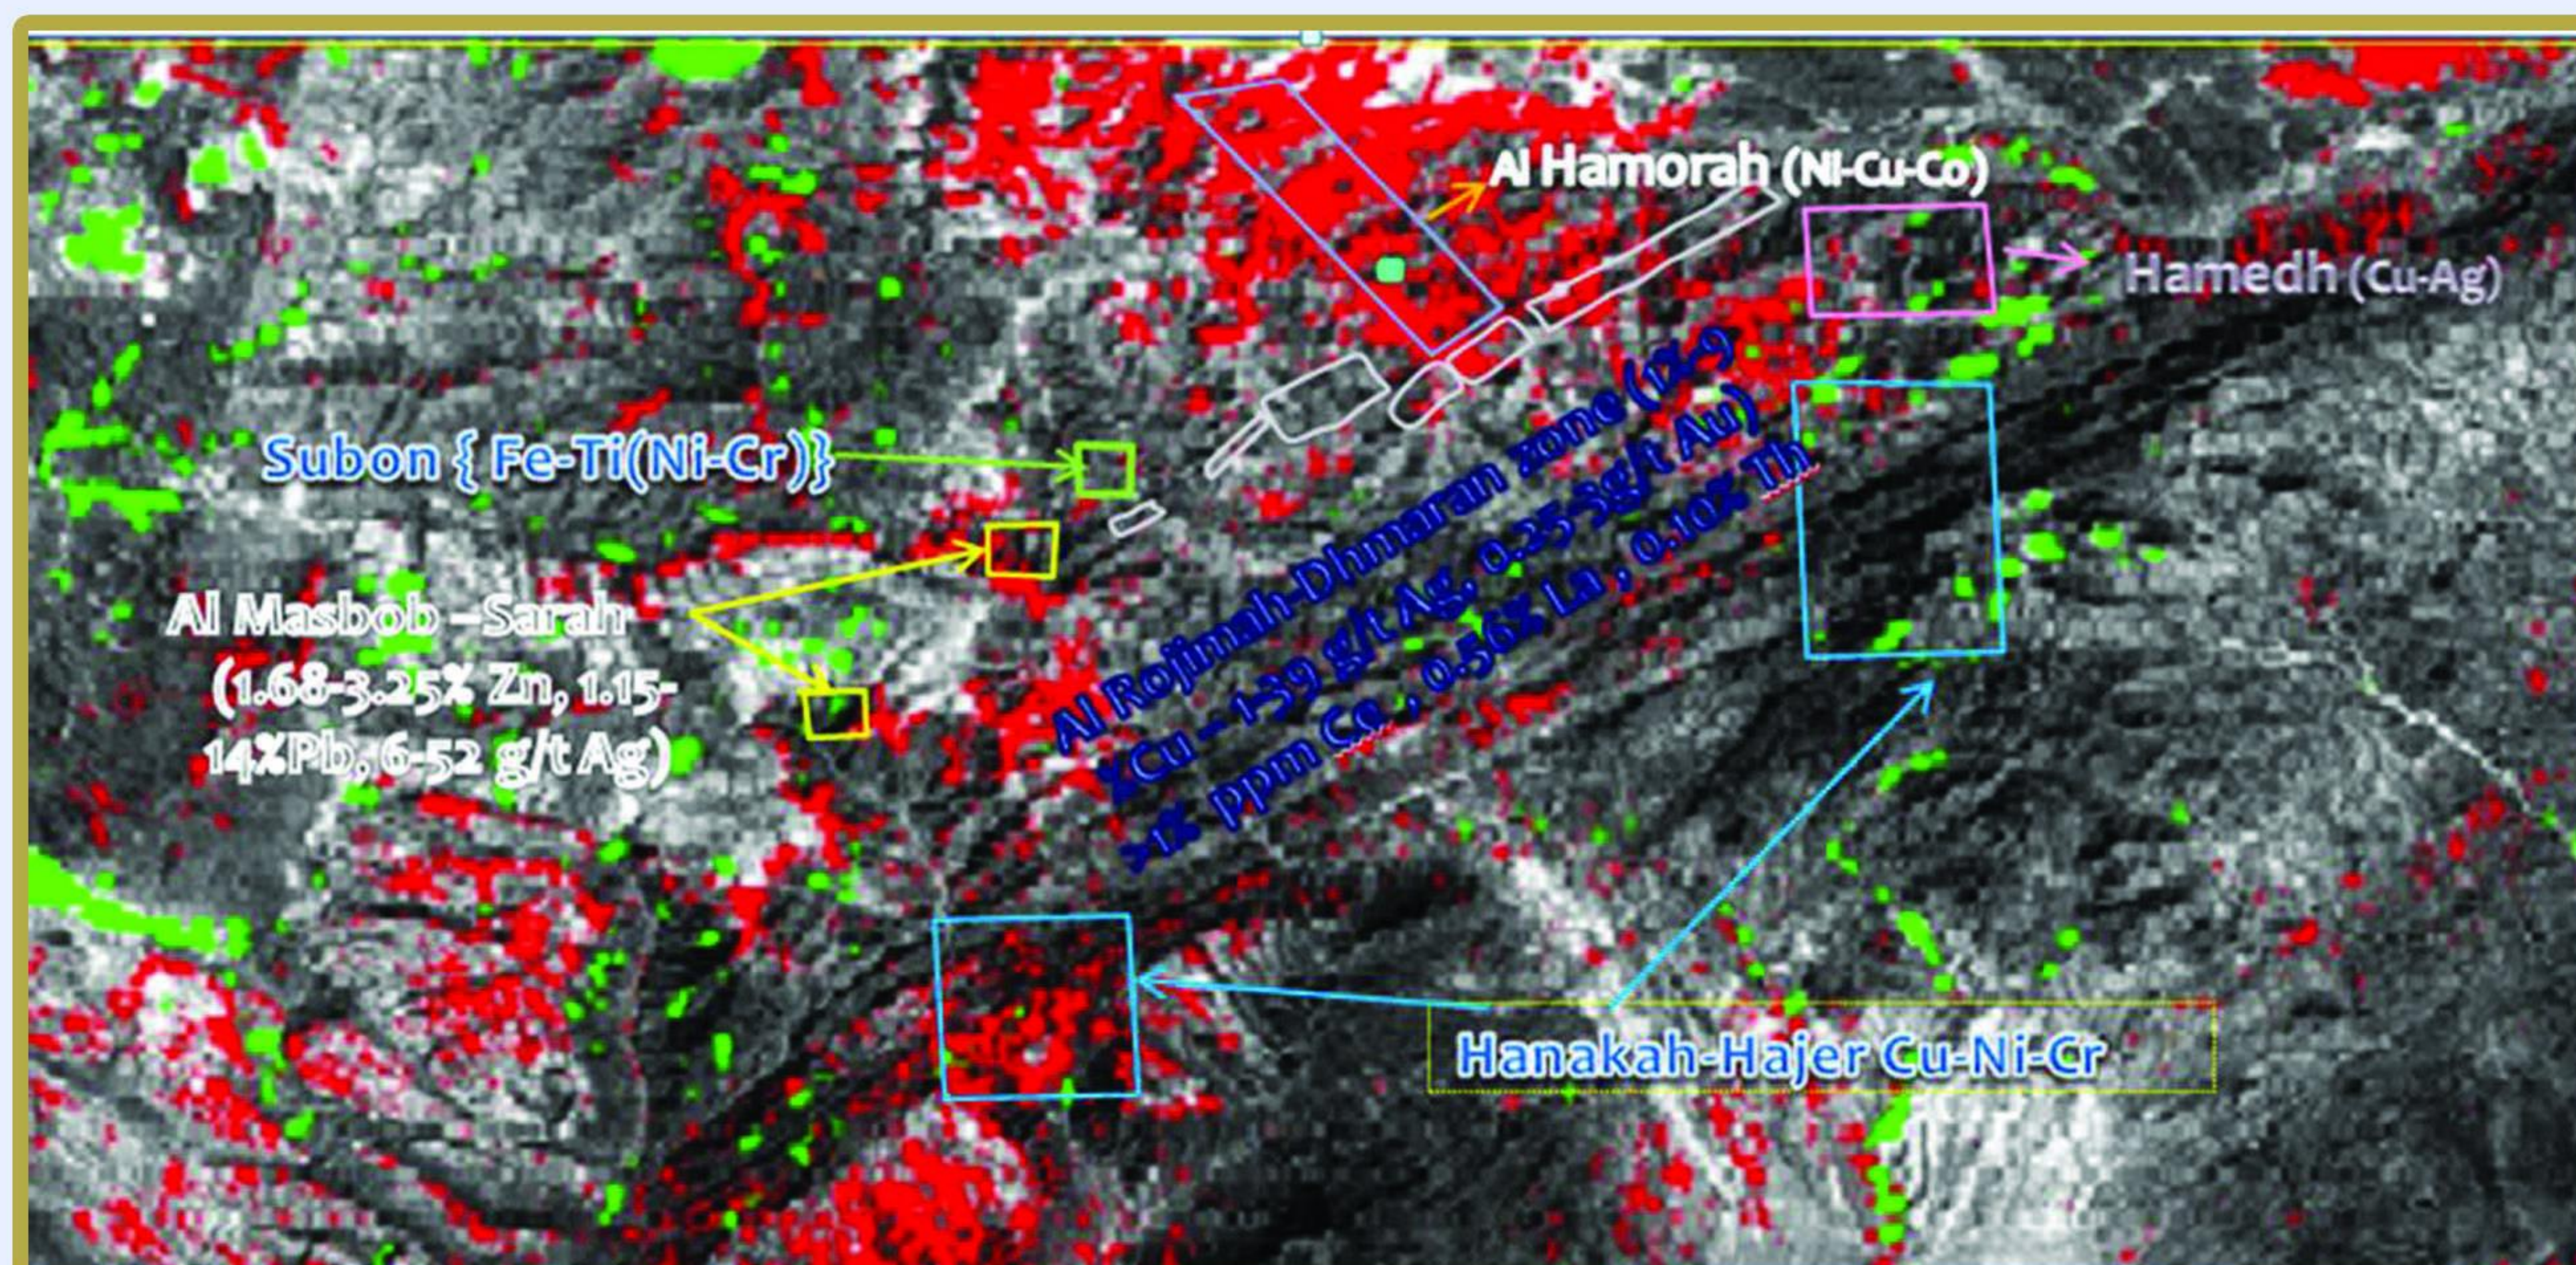

ABOUT US:

Exploration of mineral properties for Commercial mineral deposits, We have two licenses in Yemen for Prospecting & Exploration.

The Prospecting permit project for metallic is Located in south Yemen and we obtained the Prospecting License in October 2010 in south Taiz for an area over than 3,000 square kilometer.

The Exploration Permit for Nonmetallic (Graphite deposits) is in Dhamaran and we obtained the exploration license in May 2012 for about 500 square kilometer.

ENMMAR TARGETS :

Anron Energy Ltd . Co (Anron) has been Working in yemen continuously since October, The Anron company has been discovered on four targets . Dhmaran - Al Zabirah target (copper , Gold ,silver) Hamedh target (copper), has been discovered on Sarah target (Zinc - Lead) and AlMaqatirah target (Pb , Zn , Ag) (Fe , P).

Anron Company has exploration licenses at Dhmaran, It obtained the exploration license for Graphite deposits in may 2012 about 500 square kilometer .

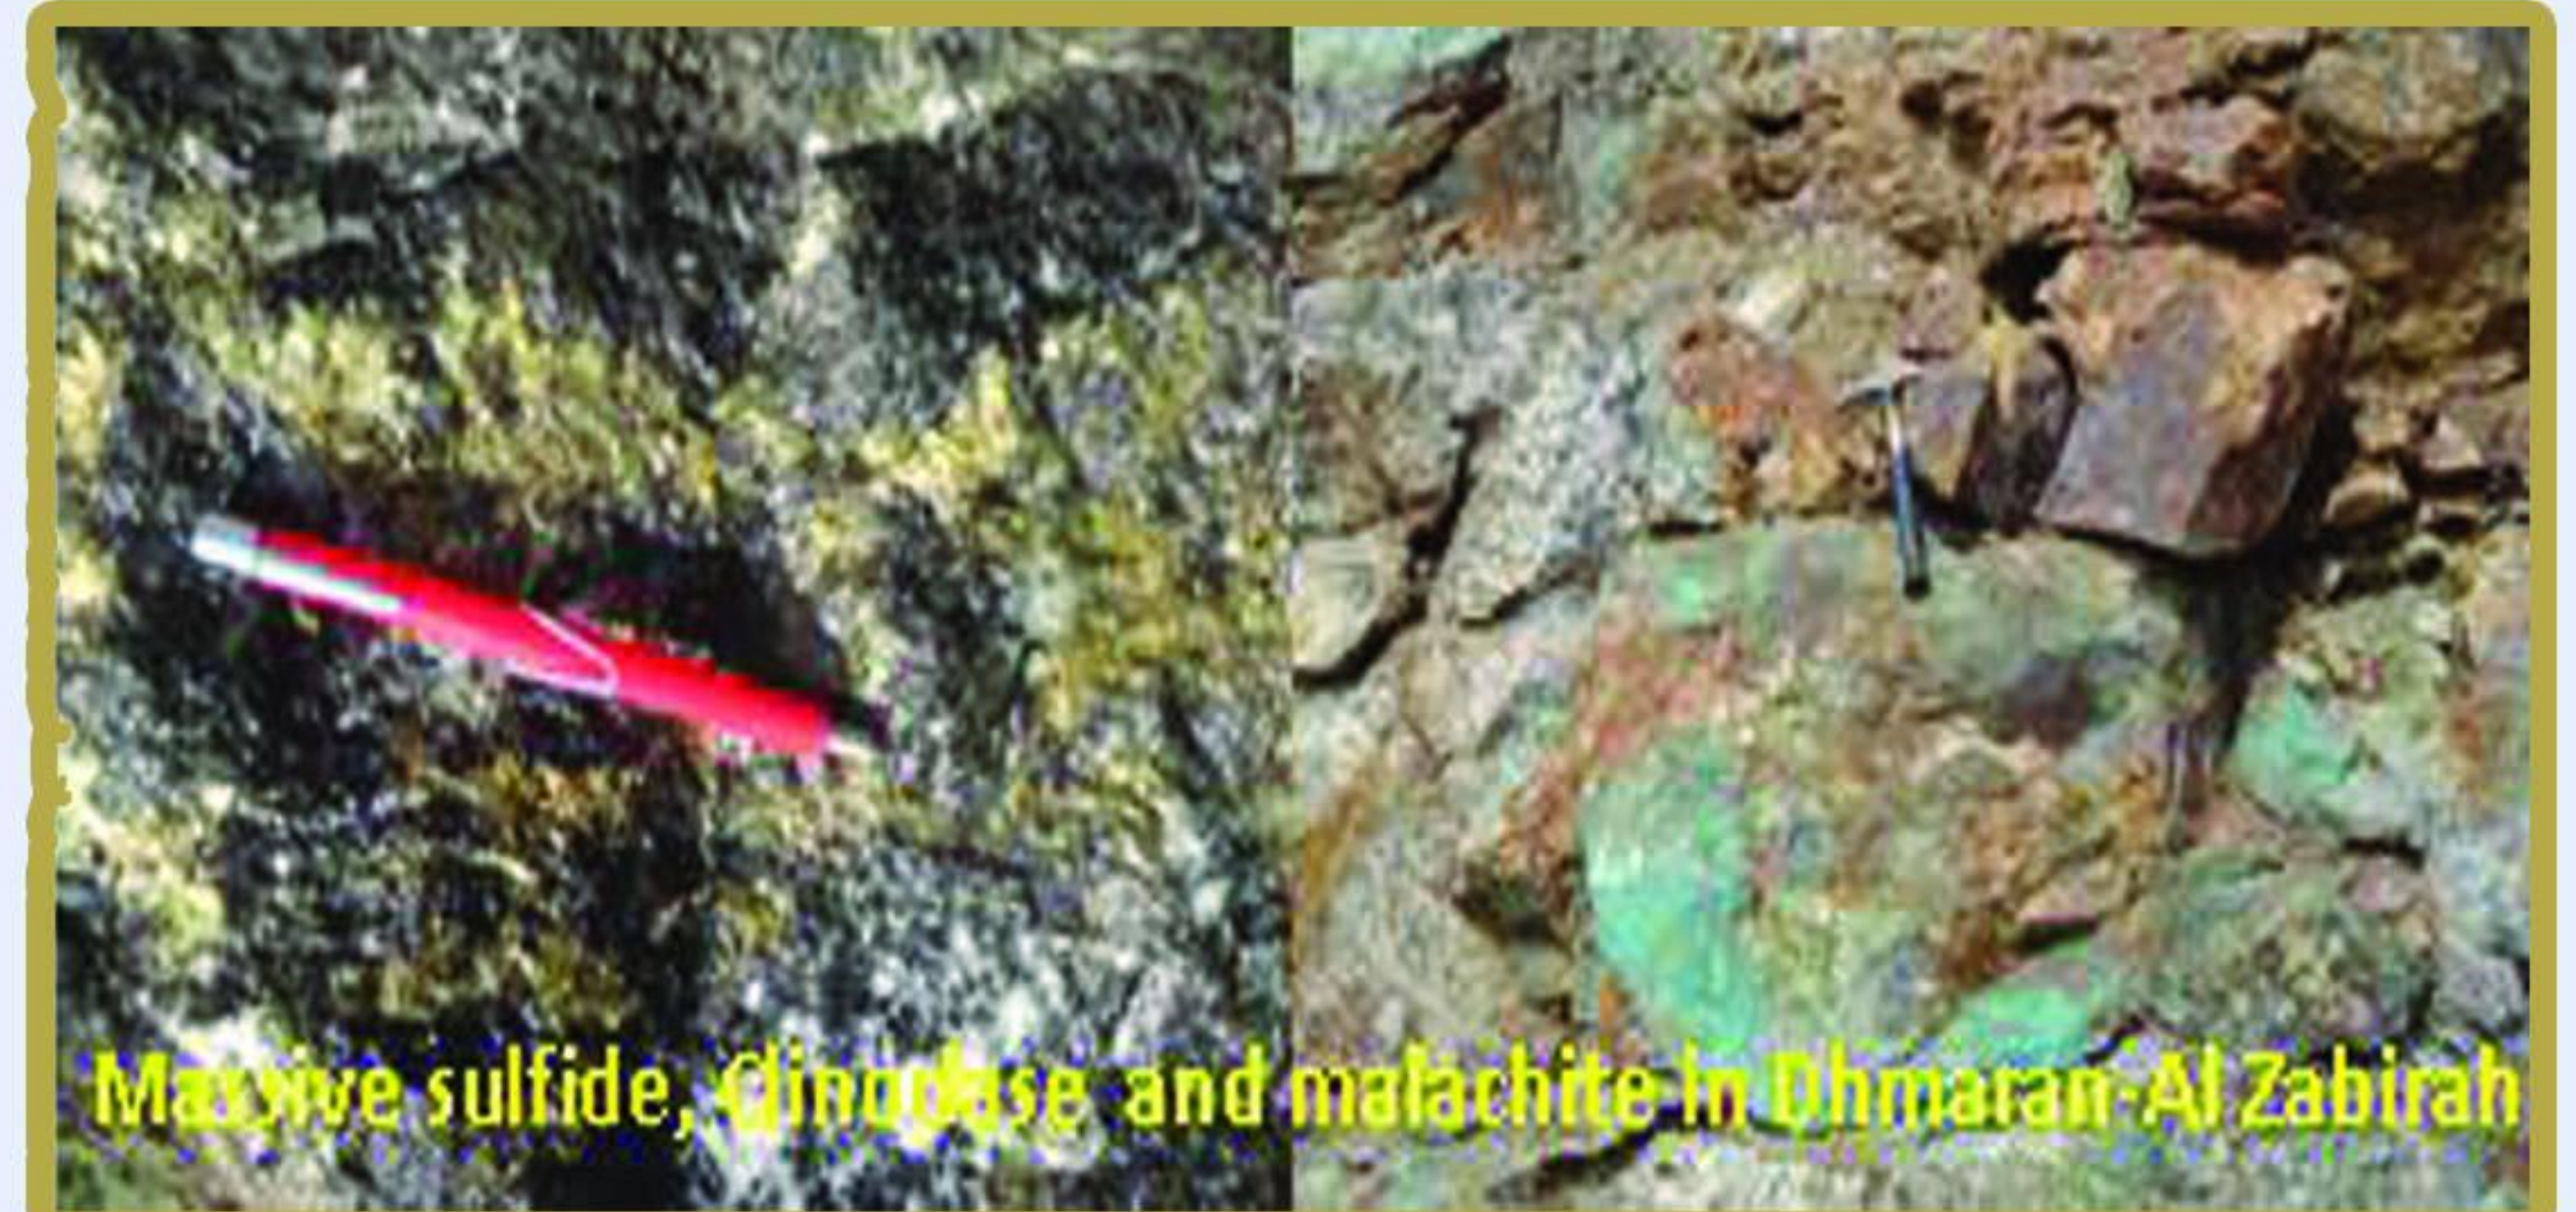

HAMEDH TARGET (Cu - Ag - Mo) :

It is located at the Northeast of Al Rahedah city for about 12km. The area underlain by magmatic gneiss (banded and folded gneiss) Including granitic gneiss, Amphibole gneiss, Quartz - biotite gneiss and graphite - sulfides gneiss interbedded with Amphibolite, Northwest trending granite, dolerite, pyroxinite and basalt dykes . The chemical results are 0.5% to 1.9% Cu, 1 g/t to 11g/t Ag, 1900g/t Mo and 121 g/t to 239g/t W .

AL ZABIRAH - DHAMRAN TARGET (Cu, Au, Ag) :

Al Zabirah - Dhamran copper, gold, silver Chromium and nickel target, is located at the Southwest of Al Rahedah that hosted in Precambrian rocks Amphibole gneiss - Quartz biotite gneiss - Quartz graphite Sulfides gneiss - body of Massive Coarse grained gabbro rocks - The gabbro rocks are surrounded by the oldest rocks

gneiss, interlayered Northeast Trending Amphibolite, Metagabbro and granite rocks. The chemical results are 1% to 9% Cu, 0.25g/t to 3g/t Au, 1 g/t to 31g/t Ag, 1000 g/t to 3000 g/t Ni, 900g/t to 1800 g/t Cr, >1000g/t Th, 1960 g/t Y, >10000 g/t Ce and 40% to 43% Fe.

Massive sulfide, Clinopyroxene and malachite in Dhamran-Al Zabirah

System Hydrothermal veins continent Hydrozincite and Galena

are cut by north west and northeast dolerite, And ecite, granite sills and micro gabbro (lamprophyre) dykes. The chemical results are 16.8% to 32% Zn, 11% to 21.2% Pb 1 g/t to 3g/t Ag And 26.47% to 41,45% Fe₂ O₃.

MAQATIRAH TARGET (Pb - Zn - Ag) (Fe - P) :

Al Maqatirah (lead - Zinc and Silver) (Iron , Phosphate) target, is located in the south of Al Turbah that hosted in Quartz biotitic gneiss - Quartz biotitic schist - granitic gneiss and amphibolite. Intrusive gabbro rocks is 800m Thick and it's fine grained text and has transitional zone of schist facies in the north side of the body, cretaceous sandstone unconformity overlying gabbro. The relationship between cretaceous and younger cover rocks to west and north is often marked by increased alteration with sandstone. Rocks are cut by northwest basalt, dolerite and diorite dykes. The chemical results are, 1%to 14% Pb,

01% to 0.26% Zn, 1 g/t to 52g/t Ag, 0.1% to 0.9% Cu, 30 ppb to 330 ppb Au, 4150 g/t to 7500 g/t Ni, 0.06% to 0.126% Cr, 49.2% to 67 %Fe₂ O₃, 0.082 g/t to 0.0330 g/t pt, 0.011g/t to 0.0200 g/t pd and 5% 52% p.

Out crop of Magnetite

Out crop of Gossan

Ultramafic content (Ni- Cr)

ALHAMORAH DEPOSIT :

Al Hamorah, nickel and copper deposits is located in the south of Taiz , Hamorah deposit is underlain by a high grade metamorphic terrain of lower Proterozoic age, Menzies et al (1994) , containing quartz-feldspathic gneiss and amphibolite, migmatite, para-gneiss, crystalline limestone metagabbro / metadiorite. Estimated copper reserves of about 47.747 metric tons and nickel at about 45.068 metric tons.

The chemical analysis results of Felix Mining Ltd. has shown copper from 0.0034 % to 1.12 % and nickel from 0.0007 % to 0.37% GEOMIN (1982) , the geological investigation work estimated a volume of reserves of 6 million tons of ore with the contents: Cu 0.80% - Ni 0.70% - TiO₂ 3% - Ag 10g/t .

GEOMIN (1984) , made the feasibility study (Approximately 4,065,000 metric tons) on the basis of a cut-off 0.05% brass and the average ratio of 0.57% copper and 0.39% nickel in addition to 9,632,000 metric tons on the basis of a cut 0.1-0.5% Cu and the average ratio of 0.25% copper and 0.30% nickel, and thereby estimated the total reserves of the deposit approximately 13,698,000 metric tons on the basis of a cut of 0.5% +0.1-0.5% copper and an average rate of 0.35% copper and 0.31% nickel, with an -1.12% and nickel ranging from 0.0007 to -0.37% .

Stone Resources Company Showed The AL Hamoarh Area is high Potential Copper and Nickel, and Potential Iron, Titanium and Other Mineral Resources .The Company is Evaluated A,B,C Ore Body In Dhi Samir Copper and Nickel Mineral . And is Found Increasing In A,B,C Reserves For Copper and Nicety.

Drill Holes in Geomin Area :

- 9 reconnaissance diamond drill holes .
- 6 deep diamond drill holes.
- 700 m of underground development .

AL SHAKKAT DEPOSITED (Cu - Ni) :

It is Located at the North west of Al Hamorah deposits for about 3.5km, the country rocks are gneisses and amphibolites, the outcrop mafic is intrusive. This mineralization zone is up to 80 meters wide.

Previous work : 5 diamond drill holes . Ground geophysical programs of magnetics, induced polarization (gradient array), turam EM, self - potential and misse a la masse surveys.

The highest grades in diamond drill holes is 0.6%Ni, 0.9% Cu . It has been determined from earlier drilling results that the mineralized zones are dominated by pyrrhotite with nickel being contained mainly in Pyrrhotite - Pentlandite intergrowths and copper within chalcopyrite The sulphides occur both as disseminations and as massive bands directed 40NE.

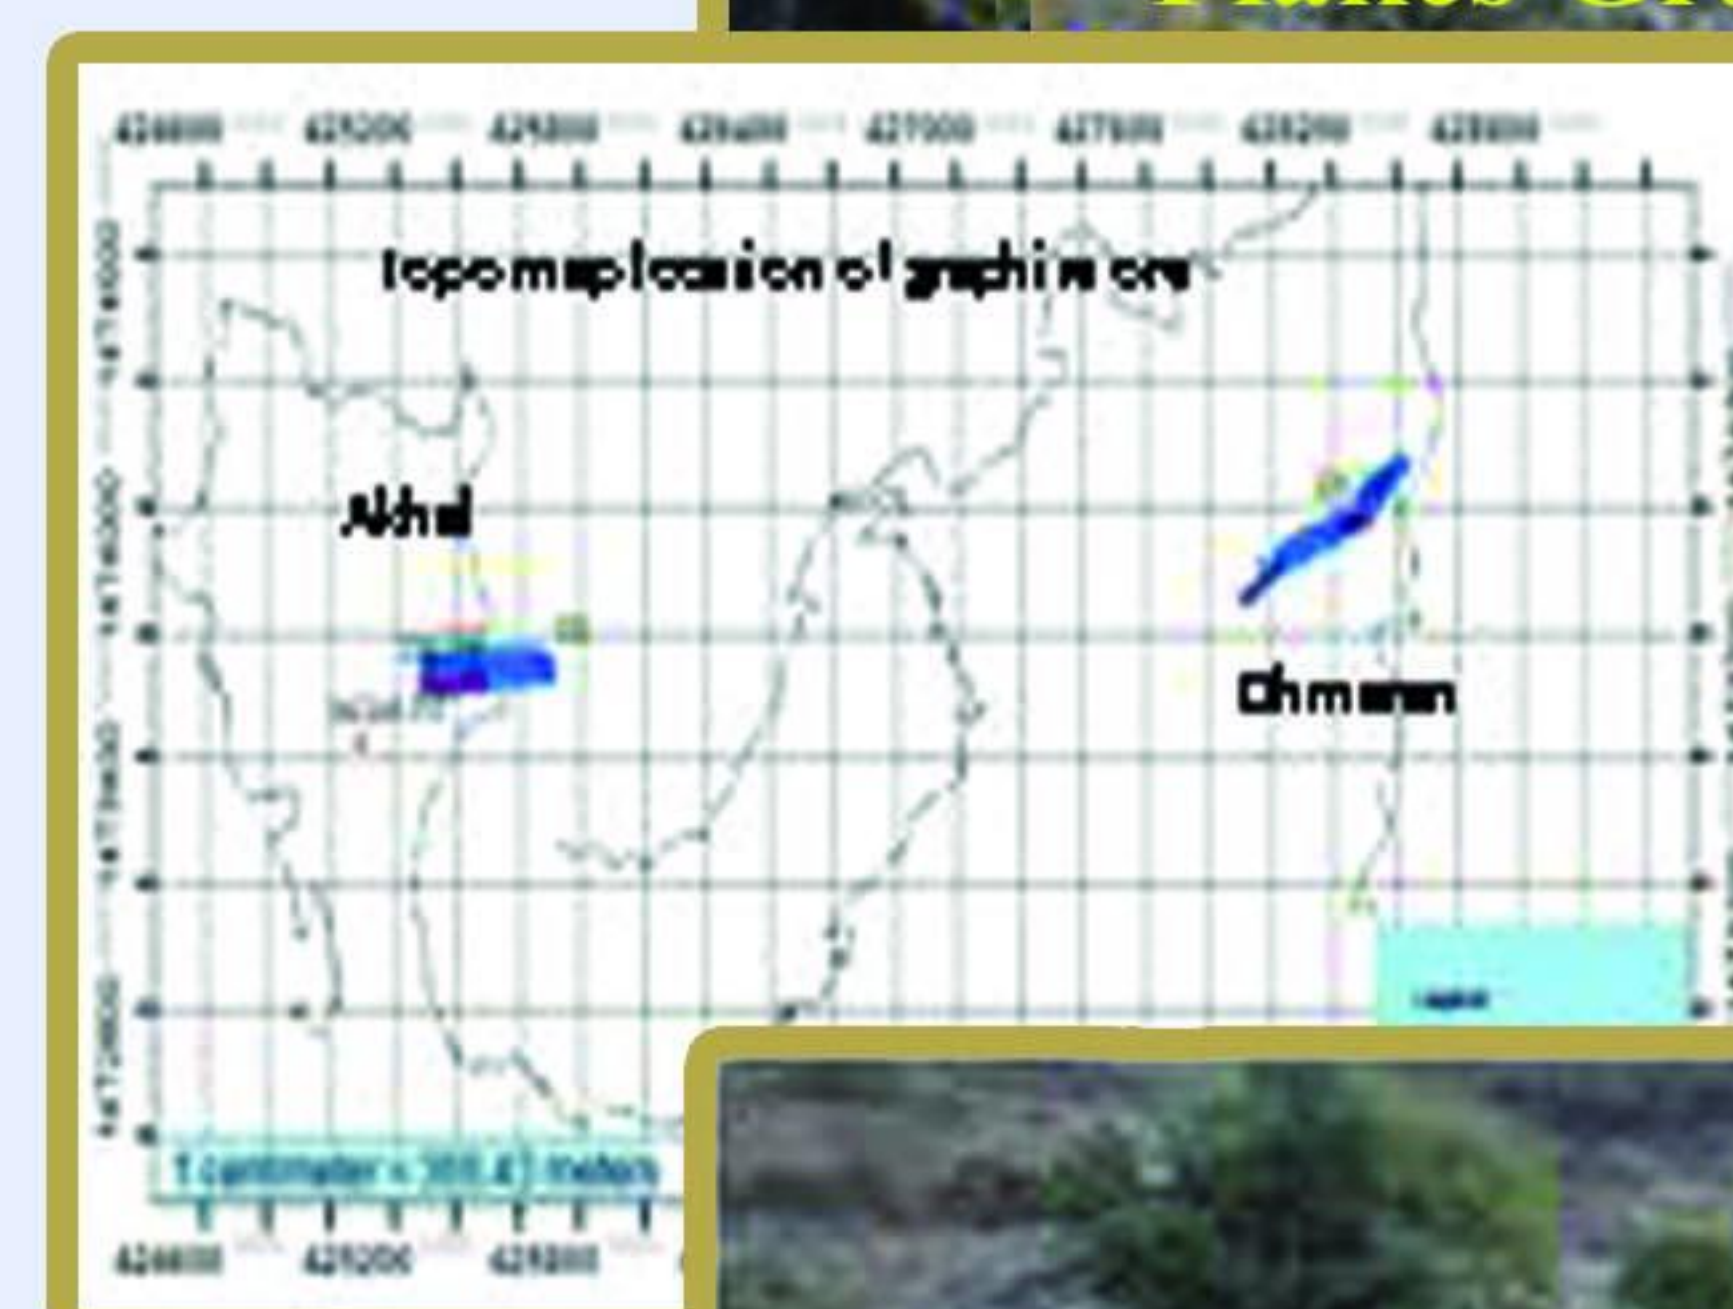

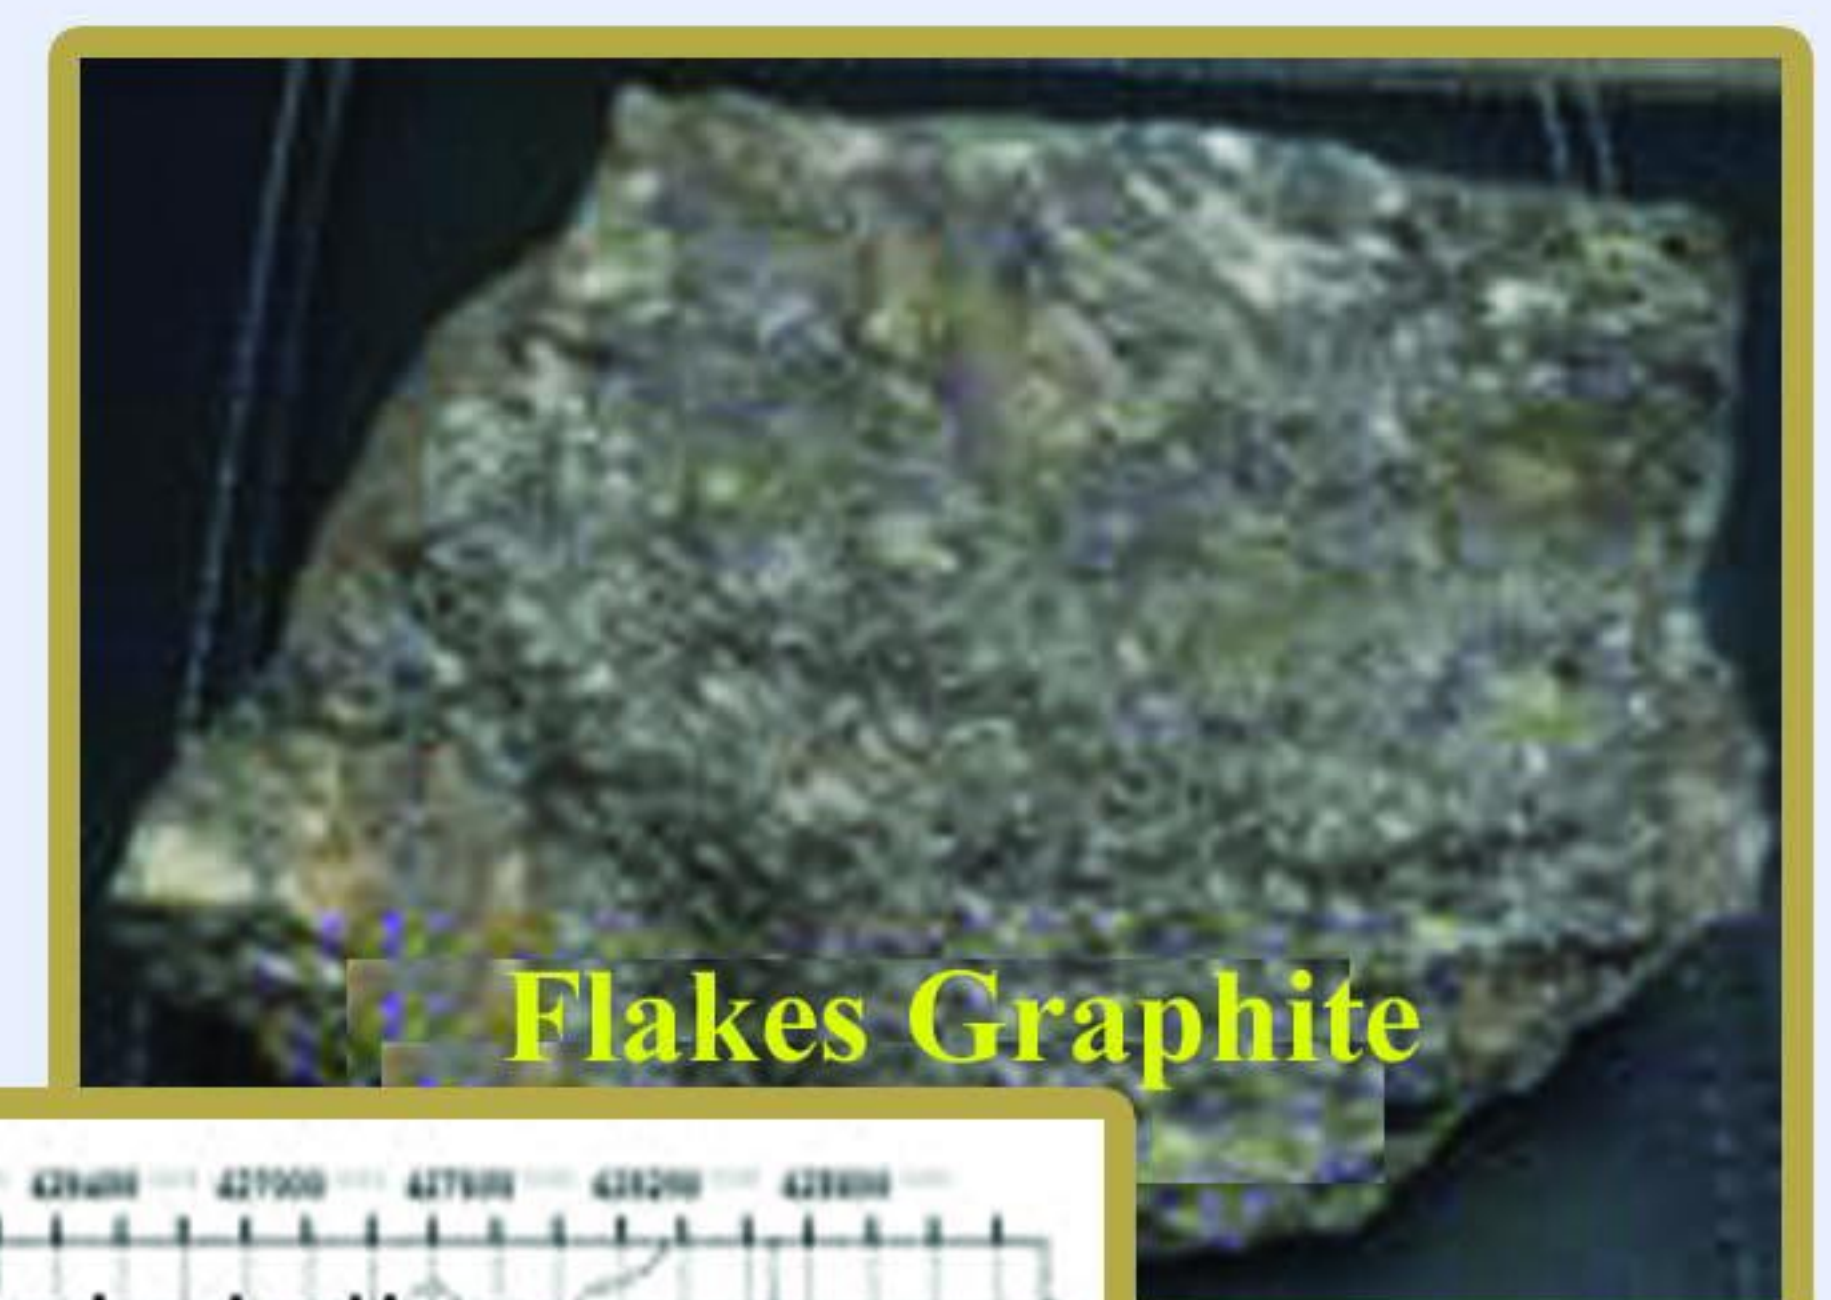

NATURAL GRAPHITE IN DHMARAN :

Flakes Graphite Area is located in south of Al Rahedah about 7 km , Flakes graphite in Dhmaran formed from the regional metamorphism .

The lenses of Flakes Graphite in this area are forms a radius of 40 meters and extends to more than 0.5km .

We found crystalline flake graphite in Dhmaran area, it is recognizable by its high metallic luster, and plate like particle morphology .

It is concentrations are in ore body. The carbon content is 15% to 35% C .
